

LYNTEC

LYNTEC
Lining for shoes

PRODUCT DESCRIPTION

Lyntec is an anti-slip lining made by an impregnated non-woven material, to be used in both shoes and leather-goods production.

Lyntec is an ideal choice to combine good technical features, such as abrasion resistance (12800 cycles in the wet test and 25600 cycles in the dry test), tear strength and tensile deformation, with an extraordinary soft and smooth hand touch.

In its higher thickness, Lyntec is particularly suitable for the production of military boots and safety shoes.

Standard colors: anthracite, black, beige, brown, dark brown, grey and white. Special colors on demand.

Lyntec can be supplied with APP polyurethane adhesive, granting a perfect adhesion to most part of the materials.

TECHNICAL DATA

LYNTEC	Weight (gr/mq)	Thickness (mm)
L05 0000 70 000	170 +/- 10%	0,50 +/- 0,05
L07 0000 70 000	320 +/- 10%	0,70 +/- 0,05
L09 0000 70 000	430 +/- 10%	0,90 +/- 0,05

BENEFITS

-  **Anti-slip**
-  **Anti-crease**
-  **Soft and natural touch**
-  **Available in different colors**

METHOD OF USAGE:

We recommend to carry out your own processing trials due to various technical and mechanical conditions and raw material compounds.

RECOMMENDED FOR

-  **Soft leather**
