INSTRUCTIONS OF USE

The toe puff is applied by a special pneumatic pressing machine, equipped with heated curved plate, timer and thermostat.

Advisable working condition:

- Temperature: from 130°C to 150°C.
- Contact time: from 6 to 12 seconds according to the thickness of the article.
- Minimum effective interface temperature: 100°C

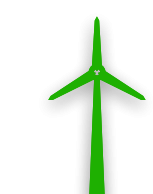

We recommend you to carry out a preliminary test of bonding as the conditions of application may vary depending on the characteristics of the upper.

There is no binding time as to the lasting period.

ATTENTION: the application of solvent glue can affect the adhesive present on the sheet, causing detachment.
